

ABSTRACT OF THE DISCLOSURE

A data management method for managing performance data of a computer system which includes: a storage area for storing the performance data as data including performance information of the computer system and other data; and a controller for controlling the storage area, is provided. The data management method includes: a step in which the controller detects free space of the storage area; a step in which the controller determines a method for storing the performance data depending on the detected free space; a step in which the controller acquires the performance data; and a step in which the controller stores the acquired performance data in the storage area according to the storing method determined in the method determination step.
